Definition and Significance of Interpersonal Conflict

Interpersonal conflict, as described in Wilmot 9th edition, refers to a process that occurs when two or more individuals perceive incompatible goals, interests, or values, leading to a disagreement or opposition. Conflict is a natural part of human relationships and can be both constructive and destructive depending on how it is managed.

Key aspects include:

- Proper management can strengthen relationships, while poor handling can damage them.

Understanding the nature of conflict is crucial for effective communication and relationship development. Wilmot emphasizes that conflict is not inherently negative; instead, it can serve as an opportunity for growth, problem-solving, and increased understanding.
