Sample Questions from the 2014 June Exemplars and Model Answers

Providing examples of actual questions and model responses can help students understand expectations.

Sample Question 1: Physical Geography

Question: Explain the formation of a composite volcano and discuss its eruption characteristics.

Model Answer:

A composite volcano, also known as a stratovolcano, forms through the successive eruption of viscous lava, ash, and volcanic rocks, building a layered structure. These volcanoes are characterized by steep slopes due to the buildup of explosive eruptions. The magma involved is typically high in silica, which increases viscosity, trapping gases and leading to explosive eruptions. Such eruptions can produce pyroclastic flows, ash clouds, and lava flows, posing significant

hazards. Examples include Mount Fuji and Mount St. Helens.

Sample Question 2: Human Geography

Question: Discuss the causes and consequences of urbanization in developing countries.

Model Answer:

Urbanization in developing countries is primarily driven by rural-urban migration motivated by seeking employment, better services, and improved living standards. Population growth in cities often outpaces infrastructure development, leading to overcrowding, traffic congestion, and inadequate housing. This results in the growth of informal settlements or slums, with associated challenges such as poor sanitation, health issues, and limited access to education. Conversely, urbanization can stimulate economic growth, create job opportunities, and facilitate infrastructural development if managed properly.
